Enhanced Mapping Capabilities

Report Library includes: ⊞ ⊠

Win/Loss Analysis
Premium Ranking
Subtotals
Territory Analysis
Customizable Maps

*Available as a **MapPro7** add-on module!*

MapSight

MapSight is a state of the art geographic data analysis module that allows you to easily visualize your premium analysis reports.

MapSight visually displays opportunity areas and vulnerabilities, providing intuitive guidance for rate strategies.

Quickly build displays with Quadrant's standard templates or use your customized reports.

Standard templates:

Win/Loss Analysis

Compare rates head to head. *MapSight* displays the score as well as the win/loss.

Use individual risk scenarios or a broad range of risk characteristics. View results by overall patterns; view details by zip code, city, county, or territory.

**Enhanced Mapping Capabilities**

Ranking

Measure your rates against up to nine competitors.

Easily determine areas needing attention during the rate adjustment process.

Advertising Dollars

Stop wasting money! Advertising in areas where your rates are extremely uncompetitive only benefits your competitors.

With *MapSight,* you can easily identify specific geographic areas to adjust your advertising budget.
